

The CLEANair Furnace Rebate Program provides consumers rebates when a gas fired furnace is replaced with an traditional heat pump split system or side discharge heat pump for split ducted systems.

What rebates are eligible?

Rebate Type	Amount
Replacement of Gas Furnace with Full Electric Heat Pump System with Ducted Air Handler (up to 5.5 tons)	\$1500

Excludes a dual fuel system which is an electric heat pump system with a gas furnace with a ducted air handler

Are you eligible for the Heat Pump System rebate?

You are eligible to receive an All Electric Heat Pump Split Systems with an Air Handler or Side Discharge Heat Pump for Split Ducted System if you met all three criteria below:

1. An eligible [all-electric, ducted, heat pump split system with air handler](#) or side discharge heat pump for split ducted systems was installed. Ductless mini-split applications are not eligible.
2. You are removing a gas-fired furnace and installing an eligible system as detailed above.
3. Your household is located within the [South Coast AQMD territory](#).

What is needed to file for a rebate?

The All Electric Heat Pump Split Systems with an Air Handler or Side Discharge Heat Pump for Split Ducted System application requirements are:

1. Detailed Invoice/Customer Contractor verifying the installation location, removal of gas furnace detailed, and equipment installed
2. Full Model & Serial Number verification for new heat pump and air handler (pictures of unit placard, equipment labels on delivery boxes, or warranty registration details)
3. Full Model & Serial Number verification for replaced furnace

How many rebates can I receive?

If multiple Heat Pumps are installed, you may receive the applicable rebate amount for each furnace or unit installed. The qualified equipment model and serial cannot be the same.

How to apply for a rebate?

- Replace the existing gas furnace with an all-electric, ducted, heat pump split system
- Go to cleanairfurnacerebate.com and fill out the online rebate application
- Upload supporting information
